Structure of Carrier Package Unit Model Numbers

Carrier's model numbers follow a standardized format, which includes a combination of letters and numbers. While variations may exist across different series or product lines, most Carrier model numbers generally adhere to a pattern that encodes the following:

Common Components of a Carrier Model Number

- **Series Indicator:** Denotes the product line or series, such as Performance, Comfort, or Infinity.
- **Size/Capacity Code:** Indicates the unit's cooling/heating capacity, usually in tons or BTUs.
- **Efficiency Rating:** Encoded with a letter or number representing the SEER or HSPF efficiency rating.
- **Configuration and Features:** Details such as single or multi-stage operation, special features,

or specific configurations.

- **Optional Custom Codes:** Additional identifiers for special features, regional adaptations, or custom installations.

For example, a typical Carrier model number might look like: 24ABB036.

Breaking it down:

- 24A: Series indicator
- B: Configuration or feature code
- B: Additional feature code
- 036: Capacity in thousands of BTUs (e.g., 36,000 BTU, or 3-ton capacity)

Understanding each segment helps identify the unit's exact specifications.

Decoding Carrier Package Unit Model Numbers

To interpret Carrier model numbers accurately, it's important to understand what each segment signifies and how to relate it to the unit's performance and features.

Series and Line Indicators

Carrier offers multiple series tailored for different needs:

- **Comfort Series:** More basic, economical units with standard features.
- **Infinity Series:** Premium models with advanced features like variable-speed fans and higher efficiency ratings.

The series code is usually at the beginning of the model number and helps quickly identify the intended application.

Capacity Codes

Capacity is often expressed in tons or BTUs:

- 1 ton = 12,000 BTUs
- Capacity codes like 024, 036, 048, etc., correspond to 2-ton, 3-ton, 4-ton units respectively.

For example, "036" indicates a 3-ton capacity (36,000 BTUs).

Efficiency Ratings

Efficiency is critical for energy savings:

- SEER (Seasonal Energy Efficiency Ratio): higher SEER means more efficient cooling.
- HSPF (Heating Seasonal Performance Factor): relevant for heat pumps or units with heating options.

Codes like "B" or "A" may denote different efficiency tiers, with "A" often representing higher efficiency.

Configuration and Features

Additional letters in the model number specify features:

- **Single-stage vs. Multi-stage:** Letters like "A" for single-stage, "B" for multi-stage operation.
- **Variable-Speed Fans:** Codes like "V" indicating variable-speed technology.
- **Special Features:** Such as humidity control, quiet operation, or enhanced air filtration.
